

# First Aid

## Teammates Names and Emails

These must be EXACTLY the same as the ones registered on <https://w3.ibm.com/developer/callforcode/register/>  
Rajesh Gudikoti ragudiko@in.ibm.com Ramesh Poomalai ramesh.poomalai@in.ibm.com

## Give us your high-level pitch

Describe your solution in 7 words or less.  
Guide to bystander on First Aid

## Describe your solution in more detail

Give us a more detailed description of what you're building, what problems you are solving and why it matters in 500 words or less.

There will be many people who needs first aid for following cases: 1. Injury which is causing bleeding. Can we stop bleeding, avoid infection by applying some medicines. (can be minor one because this can be handled most of the times by lay man) 2. Person in shock is screaming/went mute, needs to calm down. He/She needs quick Psychological analysis. 3. Person who has abnormal heart beats needs quick first aid. 4. First aid in case epidemic disease break. For e.g. guide to have high amount of water/fluids, fruits, glucose, etc. Based on epidemic disease identification, NGOs can plan for collecting relevant medicines. 5. In case we have knowledge guide what are the best medicine to these diseases. (Building knowledge may be one time activity.) Legal issue: We need authentication from right authority to specify/distribute medicine for a particular treatment?

## Solution Roadmap

How mature is your submission and where do you intend to take it from here?)  
[roadmap.txt](#)

## Link to GitHub Enterprise or other internal source repo

Must be made "public" in GHE to all IBMers after 8/31) (You can provide an additional description and diagrams here. Hint: Review the judging criteria: <https://w3.ibm.com/developer/callforcode/register/#judging>
